REPLACEMENT DISC BRAKE PAD SETS, BRAKE SHOES.

EMGO Replacement Disc Brake Pads meet or exceed manufacturers specifications. Replacement pads are available in two types, Sintered and Full Metal. Sintered Metal is a high performance brake pad material designed from a highly refined composition of metallic powder pressed into a preform mold. EMGO Full Metal pads are made of additional metallic compounds for higher friction and durability. Sold by the pair, (some models require more than one set) Packaged in 50 slide packs per carton.

EMGO Replacement Brake Shoes meet or exceed manufacturers specifications. They are available in two types: Replacement OEM (standard) and water grooved, which are slotted to help channel water and dirt away from the braking surface. Sold by the pair (some models require more than one set), each set is boxed. Like our pads, we label each set with application information and each box has a reinforced hang tab for point of sale display.

**91- Sintered Brake Pads
64-Full Metal Brake Pads
*93-Brake Shoes Standard
and Grooved**

***Items marked are available with 1mm extra shoe material for worn drums**
