Using multiple sources including
YouTube, the Tamagotchi Wiki, and
Tama Talk.

- 2 pre-installed, color games. The games are simple but fun and last 30 seconds each.
- 1 meal (rice) and 1 snack (box of sweets). Additional foods, both meals and snacks, can be grown from seeds.
- Seeds. These can be purchased at TamaDepa (the in-game store) for Gotchi Points, and the next morning will grow into a food or item.
- Cafes/restaurants. There are three cafes/restaurants on the iD L - the restaurant, the bakery and the Tama Cafe.
- Parent visit. Once you get past the first generation, when your Tamagotchi is an adult it can visit its parents.
- Park. At any stage of life, your Tamagotchi can go to the park and may find another character to play with.

- Happy symbols. By certain adult characters using certain items, happy symbols are obtained. Four happy symbols can be earned for each generation - three are from items, the last is from having your character as an adult for 48 hours (2 days). On TamaTalk's iD L Guide, found in the Tips & Tricks forum, you can see the happy symbols for all the characters.
- Interior remodels. One of the destinations you can go to is the Interior Shop. There you can purchase, for Gotchi Points, in-game room remodels. There are five rooms on the iD L which all serve a specific purpose: Main room (where your character stays when it's doing nothing in particular), kitchen (where your character goes to eat), bedroom (where your character sleeps), bathroom (where your character uses the bath) and toilet room (where your character uses the toilet). These rooms can all be remodeled so they look different.
- Garden. On most Tamas, you press B to go to the time screen, but on the iD L it takes you to the garden (pressing it again takes you to the time screen). In the garden, you can receive letters from Tamas you've connected to and grow plants.
- Clothes. When your Tama is an adult, you unlock TamaMori, a destination where you can buy in-game clothes using Gotchi Points for your adult character to wear.
- Travel destinations. For every four unique adult characters that obtain all their happy symbols, a travel destination is unlocked. Some of the unlockable destinations are Henshin Jo (where your character can transform into its Henshin Jo alter ego using specific outfits), Patchi Falls, Melody Land and Concert Hall.
- Tama Pets. When your character is an adult, it can meet baby-stage-character sized creatures called Tama Pets. Once it has met a Tama Pet 3 times, it can adopt the pet. There are 10 Tama Pets to collect, however collecting them does not unlock anything for your Tama.

The first screen of the Scale Icon shows your Tama's hunger level, friendship level, happy symbol, and your current Gotchi Points, followed by a green arrow indicating there is another page accessible if you press the 'A' button.

HUNGRY – This displays the current hunger level of your pet represented by four rice bowls. The range changes from four empty circles, when your pet is hungry, to four rice bowls, when your pet is full. There are two additional hidden bowls, making 6 in total.

FRIEND LEVEL – This bar shows your relationship level to your Tama. As friendship is increased, the colored bar moves towards the right. The maximum length of the bar can be increased by finding one or more of your Tamagotchi's happy seals, which are located below the bar.

HAPPY SEALS – In order to reach TamaTomo level, you must find your Tama's three favorite items; this could be meals, snacks, toys, clothes and accessories. The fourth seal is given to your pet when it has been an adult for 48 hours.

GOTCHI POINTS – This is where you can see your total on hand amount of the in game currency.

GREEN ARROW DOWN – This signifies that there is another page to view by pressing the 'A' button.
